7. **What is it you can't teach and who can you not teach to?**
8. **Move a single voice of the customer.**

Competencies:

- **Customer**
- **Requirements (Competencies)**
- **Communications**
- **Feedback**

Red Team Discussions

Customer:

- The Joint Logistician (Internal and external)
- The warfighter on the ground. (O4, and below), O5/O6 in the Joint Command

Comments:

Joint is an environment where you would demonstrate competencies.

O3 and below will become Cross/Multifunctional.

You can’t wait until they are in a joint billet to train them.

Hard to find Logisticians with an operational and acquisition background.

Move away from calling it joint logistics within only a DOD billet.

Red Team Discussions Requirements

O2/O3	O4/O5/O6
